Lagos, Nigeria

Full-stack engineer with experience building responsive, user-friendly web and mobile interfaces using React, React Native, Next.js, and Nuxt.js. Shipped 50+ demo applications and authored technical content reaching an estimated 100,000+ readers across multiple technical blogs. Experienced across the full frontend lifecycle — UI architecture, API integration, performance optimization, and testing — with a track record of independently owning frontend systems for startups and edutech platforms.

EXPERIENCE

OMS Labs | Virginia, United States

Full-Stack Developer

JANUARY 2025 - PRESENT

- Serving as the sole frontend engineer, independently owning UI architecture and implementation decisions across the platform.
- Designed and built a multi-admin dashboard system for 50+ internal staff, replacing a single-login WordPress-based workflow with role-based credentials and per-session login tracking.
- Architected the admin-to-frontend data flow so content edits reflect on the live site instantly, enabling real-time updates with zero propagation delay.
- Built a centralized user complaint/feedback system with automated email notifications, introducing a support channel where none previously existed.
- Designed and implemented the OMS Teachings Tracker Tool, now used by 100+ members to browse and track 350+ teachings across article, audio, and custom lesson formats.
- Collaborated with designers, product engineers, and content creators to translate cultural/indigenous knowledge systems into intuitive web applications.

Spacemates | Oslo, Norway

Mobile Development Engineer Intern

JANUARY 2024 - MAY 2024

- Built 7+ core UI screens (search, listings, booking, and user profiles) as part of a 3-person mobile development team.
- Implemented geolocation-based listing discovery, displaying nearby estate rental listings across multiple cities.
- Applied code splitting, lazy loading, and image optimization techniques to improve app responsiveness and load performance.
- Built frontend logic to integrate with backend APIs for authentication, search, booking management, and user communication.
- Wrote unit tests to identify/resolve API communication & user-interaction issues.

Hackmamba | Delaware, United States

Frontend Engineer & Technical Writer

SEPTEMBER 2021 - MAY 2025

- Built 50+ user-friendly, visually appealing demo applications using React, Next.js, and Nuxt.js to showcase product capabilities.
- Authored technical articles reaching 10,000+ readers on dev.to alone (2024), with an estimated combined reach of up to 100,000 across dev.to, LinkedIn, Twitter, and partner blogs.
- Collaborated with product teams to ensure demos and articles accurately reflected target audience needs and desired UX.

PROJECTS

Kwuo

A site to learn Igbo using text, video, and interactive games.

TECHNOLOGIES USED: TYPESCRIPT, REACT, NODEJS, MONGODB, TAILWIND CSS, ZOD, TANSTACK, EMAILJS

OMS Tracker Tool

A tracker tool to help edutech members follow their learning journey.

TECHNOLOGIES USED: REACTJS, NODEJS, EMAILJS, MONGODB, TAILWIND CSS

Izu Igbo Calendar (Web)

Built the interface to browse and convert Gregorian dates across a 120-year span of Igbo market data.

TECHNOLOGIES USED: TYPESCRIPT, REACT, NODEJS, MONGODB, TIME AND SUNSET-RELATED APIS

Izu Igbo Calendar (Mobile)

An Android app mapping the Igbo 4-day market week to the Gregorian calendar. Live on Google Play.

TECHNOLOGIES USED: REACT NATIVE, EXPO, MONGODB, TYPESCRIPT

Auto808

A car dealership web app for browsing vehicle inventory (used/new cars, SUVs, and trucks) with financing information.

TECHNOLOGIES USED: REACT, TAILWIND CSS, EMAILJS, MONGODB
